

Dairy Comp SCOUT - the better way to manage herd events!

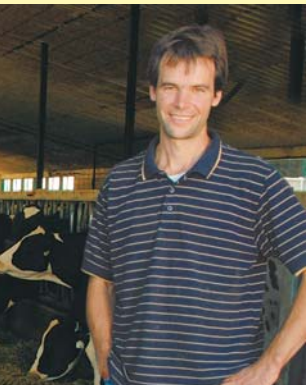

SCOUT was a good investment.

"Dairy Comp SCOUT makes managing the herd much easier. I know which animals need to be bred, are due to calve, or need to go dry. SCOUT gives us the 'cows to breed' list in seconds and using this has helped us get our 'days open' down. That's money in the bank for us."

Doug Sikkema, Hillmeadows Farms, Moorefield, ON

We re better herd managers with SCOUT.

"We download our DHI data right into Dairy Comp SCOUT. It's quick, easy and right away, our herd information is ready for analysis. This helps us make good decisions, fast. Then we can take action or intervene where needed."

Randy Slomp, Slomp Farms, Picture Butte, AB

Dairy Comp[®]

Herd Management Software

Recommended Minimum Computer Specifications for Dairy Comp Scout

- **Operating System:** Windows XP or newer
- **RAM:** 256 MB required
- **Connectivity:** Via the internet or phone line

To determine if your computer meets these system requirements, please do the following:

- On your computer with your mouse...
 - RIGHT click on the **My Computer** icon on your desktop
 - LEFT click on **Properties**
- The system information will be displayed

Note: There should be a **minimum 60 MB** of free space on your hard drive for the program to run.

Herd Management Software

Dairy Comp SCOUT

Herd Management Software

Dairy Comp SCOUT

Computerized herd management has many advantages:

Decreased desk time

Your time is too valuable to be writing vet and calving lists out by hand. Dairy Comp SCOUT can create these lists instantly, using information you already record.

Improved herd productivity

SCOUT herd management software provides the information you need to make management decisions that boost herd performance and profitability. For example, timely breeding lists make you more money by improving the reproductive performance of your herd. Decreased 'Days Open' and 'Age at 1st calving' can save you thousands of dollars each year.

Reliable, accurate records

Precise record keeping is quickly becoming a requirement for all dairy farms and recording treatments and events when they happen ensures complete and accurate records. Dairy Comp SCOUT allows you to keep all of your important herd information in one secure place and back-up copies of your herd information can be made quickly and easily providing you with peace of mind.

SCOUT has what you need!

Data Management

- User-friendly menu driven system for easy data input
- Management lists available at the push of a button
- Stores all pertinent herd data in one location
